

Stretch Hood Film

The 5-Sided Pallet Protection Solution

Provide total protection for your pallets using INDEVCO Packaging Solutions 100% recyclable Stretch Hood Film, which uses optimal gauge of a single PE film layer for maximum load stabilization, while allowing for raw material source reduction.

Tubular Stretch Hood Film runs with automated stretch hooder machines to provide 5-sided protection against tears, punctures, and tampering. Adhering to the pallet without the need for heat, it tightly secures products with superior seal strength and elastic recovery for high trauma movements. Goods in warehouse and in transit are covered from dust, dirt, and moisture.

Transparent Stretch Hood Film allows for high brand visibility and lets product codes be scanned without the need to open the pallet. With a max film circumference of 204" and an engineered stretch ratio of up to 160%, Stretch Hood Film is strong and adaptive enough to palletize large loads with ease. Custom film clarity and printing are also available for Stretch Hood Film.

Product Specifications

Product Specs	Film Circumference: 204" Maximum Web Width: 102" Maximum Stretch Ratio: Up to 160% Materials: PE, Polyethylene Gauge: 2.0 mil – 5.0 mil
Options	Videojet Printing: 1 color – 4"x4" available print area UVI (Ultraviolet Inhibitor) one-year protection
Roll Dimensions	Core Options: Fiberboard & PVC Inner Core Diameter: 3"- 6" Minimum Roll Outer Diameter: 20" or custom Maximum Roll Outer Diameter: 48"
Product Performance	Superior seal strength 5-sided protection High film clarity Excellent tear and puncture resistance
Machinery	Beumer, Ecolo, Lachenmeier, Möllers, MSK

Stretch Hood Film Benefits

Compared To	Stretch Hood
Stretch Wrap Film	Provides a clear packaging surface for brand visibility, easy barcode reading, and tamper evidence Offers 5-sided protection against UV, weather, water, dust, and dirt Faster pallet wrapping operation Less plastic material used for packaging the same size load
Shrink Hood	Does not require a heating element, eliminating running and maintenance costs Can be used on heat sensitive products Faster pallet wrapping operation Energy savings
Shrink Film	Does not require a heating element, eliminating running and maintenance costs Can be used on heat sensitive products Is not affected by environmental aspects such as heat and includes UV inhibitor Faster pallet wrapping operation Energy savings Does not contain banned or harmful chemical that might be emitted during operation
