

Coated Paperboard

For Folding Carton Converters

INDEVCO Packaging Solutions manufactures coated paperboard engineered specifically for folding carton and formed tray converters who require a high-performing fiber-based material with exceptional strength, converting performance, and maximum printability.

Our Coated Paperboard is designed for a wide range of applications, from food service packaging and consumer brand packaging to private label products. Its consistent surface quality provides superior ink adhesion and color reproduction, ensuring vibrant, high-impact graphics that enhance shelf appeal and brand recognition.

We offer a variety of functional coating options tailored to meet your packaging needs, including oil- and grease-resistant coatings that perform well in demanding food applications and moisture-resistant coatings that maintain integrity in cold or humid environments. Sustainable coating alternatives are also available to support your company's environmental goals, providing protection without compromising recyclability or compostability.

Whether you're packaging hot or cold foods, dry goods, or premium consumer products, our coated paperboard delivers the strength, print quality, and performance you need, all while supporting a circular approach to fiber-based packaging.
