

## Gold & Silver Liner

### For Moisture, Oil, and Grease Barrier Protection

Gold and Silver Liner is manufactured by INDEVCO Packaging Solutions and engineered by corrugated manufacturers to meet the functional and aesthetic needs of a wide range of industries. It is commonly used as a cake board, pastry tray, fish board, or skin board, providing a sturdy and reliable base for food and retail packaging applications.

Designed with an attractive decorative finish, the liner enhances product presentation and shelf appeal, helping packaged goods stand out at the point of sale while maintaining structural integrity throughout handling and transportation.

Our reversible Gold and Silver Liner can also be customized with performance-enhancing features to withstand moisture, oil, and grease, making it suitable for demanding food-contact environments. These added protective properties help preserve product quality and maintain cleanliness during storage and display. Ideal for seafood processors and other food producers, the liner delivers the durability and resistance required to support fresh and frozen products while contributing to a premium visual appearance.

By combining functional strength with decorative appeal, Gold and Silver Liner provides a versatile packaging solution that supports both product protection and brand presentation for end customers.
