

Centerfold Sheeting

C-Fold Plastic Film

INDEVCO Packaging Solutions produces environmentally friendly C-Fold Sheeting using recycled resins from both in-house post-industrial scrap and trusted post-consumer sources. In addition to incorporating recycled materials, we continuously work to minimize our environmental footprint by downgauging film, optimizing energy consumption during production, and reducing waste sent to landfill. These initiatives help support our customers' sustainability goals while maintaining the high performance required for demanding packaging applications.

we manufacture polyethylene Centerfold Sheeting with flexible resin formulations tailored to customer requirements, including recycled content or 100% virgin resins. The film is folded in half and rolled to optimize storage and handling, taking up approximately half the space of a single-wound film roll. Pre-sealed on one side, C-Fold Film enables fast and efficient product packaging while delivering reliable seal integrity, excellent puncture resistance, and strong burst performance for dependable protection during transport and storage.

Let's discuss your packaging needs and how recycled Centerfold Sheeting can help support your environmental goals.

Centerfold Sheeting Benefits

Versatility

Adaptive for individual product needs, the diverse gauging and sizing options of Centerfold Sheeting allow it to be used for a variety of applications. Pre-sealed on one side, this C-Fold Film quickly and easily packs products of all shapes and sizes for maximum efficiency.

Display Properties

Customize Centerfold Sheeting to your brand needs. Offering line, screen, and process printing up to 8 colors front-to-back, this film delivers vibrant designs using water-based inks. Further customize packaging with varying clarity, gloss, and stiffness properties as needed.

Package Integrity

Keep product protected from the elements and packaging intact with the excellent puncture and burst resistant properties of Centerfold Sheeting, with optional UV inhibitors adding one-year protection from the sun.

Space Saving

Use more space in warehouse for finished product with Centerfold Sheeting's folded in half design taking half the space of a single wound film roll. The folded roll design takes less inventory space and still yields the same film width as a roll twice it's length.
