Learn more about Transport Packaging

Transport Packaging

High Quality, Cost Effective Flexible Packaging Solutions

Challenges in Transport & Logistics

The industrial salt and minerals market faces several packaging challenges, including:

- **Load shifting/damage during transit**
- **Exposure to moisture, dust, and weather**
- **Packaging waste and cost inefficiencies**
- **Increasing demand for sustainable solutions**

How We Support Transport Efficiency?

Load Stability
Secure pallet integrity across long distances

Cost Optimization
Lightweight materials reducing overall costs

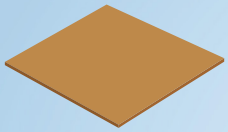

Protection
Barrier solutions against moisture & contamination

Sustainability
Recyclable & downgauged plastic solutions

1

Slip Sheets

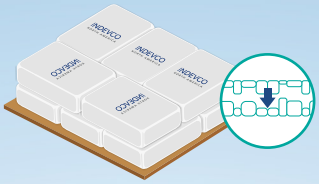

A cost-effective and greener alternative to pallets, slip sheets are made from laminated paperboard

2

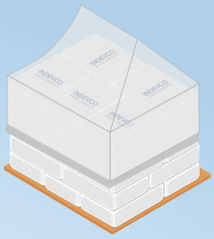

+ FFS Film

Helps maintain a dust-free environment when filling resins, pellets, powders, flakes, and granule products.

+ Interlocking Patterns

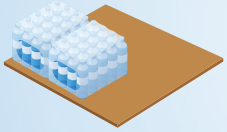

Our FFS bags feature a unique interlocking design for secure stacking on pallets, providing stability, enhanced safety, and optimized storage for efficient transport. Ideal for food, chemicals, or other products needing safe, streamlined logistics.

+ Stretch Hood

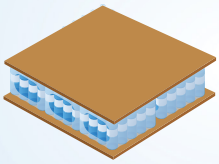

Secure pallets with 5-sided protection against dust, dirt, moisture, damage, and tampering during storage and transit.

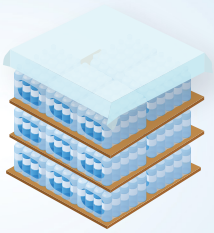

+ Shrink Film

Maximizing multi-pack security and display with high resistance and strength, printed or unprinted.

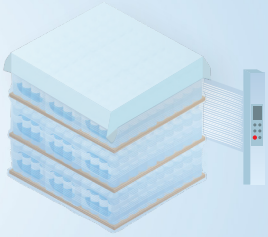

+ Tier Sheets

Stable, stackable layers for boxes and containers. Recyclable, reusable, and moisture-protective styles available.

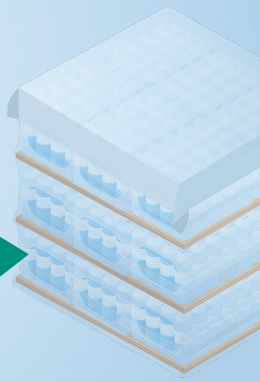

+ Top Sheets

Plastic Top sheets Prevent products from direct contact with pallet board and to protect products loaded on pallets.

+ Stretch Wrap

Clear pre-stretch film to wrap and protect pallets and boxes with secure, super tight load stability during handling.

700
Slip Sheets

=

1 pallet worth of space saved!

+ Pallet Caps

Paper Pallet caps protect unitized loads from strap damage and they create a stable surface for stacking.

About INDEVCO Packaging Solutions

The operations within INDEVCO Packaging Solutions Division manufacture a wide range of converting materials for folding carton, corrugated, and plastic packaging.

As a trusted partner in product development, we emphasize innovation – whether it's selecting newly introduced raw materials, enhancing and testing packaging designs, or improving the runnability of new products.

We work closely with our customers to contribute to their sustainability goals. We offer downgauged and lightweight materials, source supplier chain-of-custody certified renewable materials and eco-friendly coatings, produce post-industrial recycled (PIR) and post-consumer recycled (PCR) resins, and design packaging for recyclability or compostability.
